CARE INSTRUCTIONS

INITIAL USE

1. After removing from box, mat should lay flat in a warm, dry environment for several hours to allow it to relax and uncurl before placing into service.
2. Shedding or fuzzing is not a carpet defect, but rather common to new fabrics. This will disappear after a few vacuumings.

VACUUMING

To extend a mat's usefulness and appearance, regular vacuuming is required. A commercial upright vacuum with beater brush is recommended.

- High traffic – daily vacuuming.
- Medium traffic – every other day vacuuming.
- Low traffic – weekly vacuuming.

 **NOTE:** Carpet mats can be shaken outside if manageable. Vacuuming is preferred.

SPOT STAIN REMOVAL

- Vacuum area, using a scraper when necessary.
- Apply spot remover. Do not overwet.
- Gently blot and scrub spot.

SHAMPOOING/EXTRACTION CLEANING

Shampooing or extraction cleaning is required when vacuuming fails to restore color of carpet due to excessive embedded soil.

- Vacuum area thoroughly.
- Use any neutral synthetic detergent with tepid water (1/2 cup per 1 gallon of water).

CAUTION! Avoid temps exceeding 120°F.

WARNING! Do not use solvents, pH detergents or alkalis directly on the mat.

- Hand brush or extraction clean.
- Rinse with cold water.
- Remove excessive water.
- Place on an incline position to drain and dry completely.

WARNING! Do not use rotary scrubbers or other mechanical cleaners or scrubbers to clean.

PROPER STORING

- Roll carpet in compact roll with pile facing out.
- Lay flat. Do not stand on end as this will cause the edges to curl.
- Do not crush.
- Store at a moderate temperature in a dry area.
